Have anyone developed app's which makes statistics on the log-files.
have tried to something myself, but havn't succeeded to read the log-files bayes_seen and bayes-toks files in the right format.

Best regards

Ole Fisker

You are looking at the Bayes DB files. You can view them with sa-learn --dump (see the sa-learn documentation in the sa\doc subdirectory of your installation).

The NoSpamToday! log file is nospamtoday.log, located in the installation directory.
