What is the error No Buffer Space available? Is this a problem of memory capacity? I have 1 Gb of RAM on Win2003 R2 and dedicated 40% to NOSPAMTODAY. I raise it now to 80% and put the service to restart automatically but an explanation might be helpful.

Thx for the support.

This is the WSAENOBUFFS (error code 10055) message from the operating system.
Use this information to search the Microsoft knowledge base.

Probably there is a hotfix missing, or some tuning might fix the issue.

Check out this one, for example:
