Hello,

in first, your program makes a wonderful job!

I've got a problem with the NST (V3.1.3.1)

i will have to block pdf files, but there are sender wich must not blocked.

Can you help me in this case?

best regards

Thilo Hartmann

1. Put "pdf" on the Blocklist in your Attachment filter.
2. Add the sender addresses you want to be able to send pdf documents to the Whitelist filter.
3. For security reasons, NoSpamToday's Attachment filter and the AntiVirus filter by default ignore the whitelist and check every incoming email.

To change this behaviour, add

`IgnoreWhitelist="false"`

to the [ServerSessionManager\Ports\SMTPPort\Filters\AttachmentConfig] section of your nospamtoday.cf file.

Remember to restart the NoSpamToday service after saving the nospamtoday.cf.
