This is a feature request:

I would like to see a function to temporary disable a filter. Something like a little checkbox. Right now I have to delete and re-add a filter when doing some tests.

Regards  
Dave Camenisch

This makes sense. I'll add it to the wish list for the next release.  
Thanks for your feedback.

I also miss this function a lot. Especially, when trzing a new filter, which is not configured properlz  
zet, this would be verz helpfull.

Regards

Markus
